PETERSBURG, VA., September 27 .-(Special)-The Church of Christ, the house of worship of the denomination of Disciples in this city, was formally dedicated on Sunday by simple, but impressive services. The attendance at each service was quite large, many people of other denominations being present. Mr. Rutledge will remain here for several days, and will preach every night at the church. The denomination here numbers about a score of members, but they are all active and zealous in their work for the upbuilding f the church. They have now a very neat edifice, centrally and pleasantly located, in which they will worship

that the comparative case of considered don money market must be considered as in some sort fictitious, the rate being kept down with the purpose of aiding the Indian Government in floating its loan. Russia and Austria-Hungary have a lively competition for gold, and there is a large balance in the Bank of England which Japan has the power to withdraw. it is believed withdrawals of gold on a large scale for shipment to the United States would precipitate a sharp rise in the rates for money, and would thus in-duce the leaving of funds there by Amer-

The foreclosure sale of the Union Pa-cific and the withdrawal of \$30,000,000 or \$40,000,000 of cash, while it was necessary, is a matter that looms up in the per-spective of the money market situation. Under these conditions it is believed that there will not be any immediate resump-tion of such stock speculation as has characterized the market for many months was.

CONDECTED OF THE COMPANY.

The chief object of the company is to carry an account.

OBJECTS OF THE COMPANY .- The chief object of the company is to carry on a general trade in and to develop the gold fields of British America and Alaska, including especially the Klondike district, and other equally rich but hitherto undeveloped placer and quartz regions at the head waters of the Yukon river, about which the company has reliable information from returned explorers and from members of Government Surveys of Canada and the United States

While other companies are trying to buy or locate claims in the gold regions this company has bought the entire property of Mr. A. E. Ironmonger Sola, of Dawson City, consisting of ten mining claims, under new regulations, and on which a force of men is now at work taking out gold. On one of these claims a prospect shaft has been sunk to within five feet of supposed bed rock, and out of which gold was taken at an average of \$1.25 per pan, actual gold, and by the use of no better method than the common sluice-box. These claims are 100 feet up and down the creek and running back to the mountain or rim rock on an average of from 200 to 1,500 feet. The pay gravel or detritus is to a depth of about or rim rock on an average of about 20 feet to bed rock. We do not undertake to say how much gold any one of these claims will produce, but when you figure that a pan produces, say \$1.25, and there being 120 pans to the cubic yard of earth, and a claim being 100 feet long by say 1,000 wide and 20 feet deep, the result is so great that it seems fabulous. Yet it is a fact that some pans have produced as much as \$500 or \$600, and it is no uncommon thing to get as much as \$10 to \$20, but even at the very conservative result of \$1.25 per pan, when it is understood that this company owns ten claims on Bonanza and Last Chance creeks, right in the heart of the Klondike, it is not unreasonable to expect great fortunes to be taken from these claims; and, besides, the company are now arranging to send a number of small prospecting parties to the Klondike regions in the early spring to continue prospecting and locating new claims, and during that time to do a general trading business, out of which the company expect to make great profits.

The personnel of the Board of Directors and the officers is such as to warrant beyond question prudent yet energetic management, which will assure the marked success of the company's business. All of the gentlemen interested have been, and are, prominent and successful in the largest affairs in the country; have such financial, mining, and commercial experience, and possess such a practical knowledge of buying and selling, of trading and pioneer work; the ability to select and appoint as managers and agents the most competent and responsible men for the various posts, and by influence and connection so close a touch with the largest amount of active capital at home and abroad as to justify the fullest confidence.

Write to Home Office, 63 and 65 Wall street, New York, for prospectus.
